

## Toyota Forklift Part

Toyota Forklift Part - In the United States, Toyota Materials Handling inc., or TMHU, continues to be the top selling lift truck supplier since 1992. Proudly celebrating more than 40 years of service, the Irvine, California established business presents a comprehensive line of quality lift vehicles. Attributable to their status of superiority, reliability, and sturdiness, Toyota remains prevalent in this aggressive market. Quality is the cornerstone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are built here.

All Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its dedication to relentless progress and its environmentally friendly systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70 percent fewer smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and regulations.

### TMHU, U.S.A. - Leading the Industry

Brett Wood, President of TMHU, associates Toyota's accomplishment to its robust commitment to fabricating the finest quality lift trucks while delivering the utmost client service and assistance. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's principal lift truck dealer and is among the magazines impressive World's Most Admired Companies.

### Redefining Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an excellent company principles towards environmental management within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability cannot be matched by other corporations and unquestionably no other resource handling manufacturer can thus far rival Toyota. Environmental accountability is a fundamental aspect of company decision making at Toyota and they are proud to be the first and only producer to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet an added reason they remain a leader within the industry.

Toyota first launched the 8-Series line of lift trucks in 2006, yet again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission values, and California's more environmentally friendly emission standards. The end product is a lift truck that creates 70 percent fewer smog forming emissions than the existing Federal standards allow.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its dedication to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and neighborhood parks that were damaged by fires and other ecological causes. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's network of dealers to non-profit organizations and local customers to help sustain communities all over the United States

Toyota's lift trucks provide improved efficiency, visibility, ergonomics and resilience, and most significantly, the industry's leading safety technology. The company's System of Active Stability, often known as "SAS", helps reduce the risk of incidents and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability senses many factors that might lead to lateral instability and possible lateral overturn. When one of those conditions are detected, SAS instantaneously engages the Swing Lock Cylinder to steady the rear axle. This changes the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding durability.

SAS was initially released to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS have been integrated into nearly all of Toyota's internal combustion products. It is standard equipment on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker education, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's hardnosed standards continue far beyond the machinery itself. The company believes in providing general Operator Safety Training services to help clients satisfy and exceed OSHA standard 1910.178. Instruction courses, video tutorials and an assortment of resources, covering a broad scope of topics-from individual safety, to OSHA rules, to surface and load conditions, are available through the vendor network.

Toyota has sustained a permanent presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America today are built in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126

acres. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the total commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and consumers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and finally a training center.

TMHU has 68 official industrial equipment dealers, along with 189 dealership locations throughout the United States, offering the most complete and inclusive consumer support and customer service in the industry. The company's new and Licensed Used lift trucks, service, components, and financing features make Toyota dealerships a one-stop shop to guarantee overall consumer satisfaction.
