

JLG Forklift Parts

JLG Forklift Part - After retiring in the late 1960's, John L. Grove set out on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

While on their trip, John spent time conversing with previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a vast marketplace for a product that could quickly and safely lift individuals in the air to accomplish maintenance and other building services.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they manufactured and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has extended itself into many different international markets and continues to cultivate new machines to guarantee that clients are able to become safer and more efficient within their workplace.
